No events are currently listed for the winter period

**The club put on the usual great display at
agfest**

THE ATKINSON CYCLE ENGINE

The **Atkinson-cycle engine** is a type of internal combustion engine invented by James Atkinson in 1882. The Atkinson cycle is designed to provide efficiency at the expense of power density. The second and best-known design was the *cycle engine*, which used an over-center arm to create four piston strokes in one crankshaft revolution. The reciprocating engine had the intake, compression, power, and exhaust strokes of the four-stroke cycle in a single turn of the crankshaft, and was designed to avoid infringing certain patents covering Otto-cycle engines.

An Atkinson Cycle engine in miniature

ANNUAL GENERAL MEETING

CAN YOU HELP?

The September meeting at the Penguin clubrooms will be our AGM. It is important for the future of the club that we fill all of the committee positions. For 2023 -24 some members have been holding multiple positions and in the long run this is not sustainable.

Are you able to help? even assistant positions are important.

BAKES SAWMILL P/L
847 Claude Rd.,
SHEFFIELD

For
all your
sawn timber
needs please
give us a call
